British Columbia, Canada | JKoellGIS@gmail.com | [LinkedIn](#)

Skills

GIS Skills: ArcGIS Pro, Python for GIS (Arcpy), Workflow automation, ESRI Development, VertiGIS Studio Web, VertiGIS Studio Workflow, Spatial Data Analysis, Cartography, Geodatabase Management, Enterprise Portal Administration, ETL Automation, QGIS.

Technical Skills: Python, JSON, HTML & CSS, Javascript, SQL, PostgreSQL, RESTful APIs, FME, React, Powershell, VS Code, Azure, Node.js, Leaflet/Mapbox.

Communication Skills: Project Management, Technical Writing, Leadership Fundamentals.

Experience

Regional District of East Kootenay

GIS Mapping Technician | May 2024 - Present

- Design, configure, and maintain desktop GIS mapping applications using VertiGIS to promote access to geospatial data within the organization.
- Create, edit, and maintain authoritative GIS datasets including infrastructure assets, parcels, civic addressing, land use, environmental areas, and other municipal data.
- Develop and maintain Python scripts to automate workflows that streamline ETL processes, data creation, geodatabase updates, data backup, and quality control.
- Develop and maintain customized ArcGIS Pro toolboxes using ArcPy.
- Support batch updates and data integration from external sources (Parcel Map BC, ICI Society, GeoBC, DRA).
- Implementing ESRI solutions via Enterprise Portal and AGOL to allow for internal staff to access, collect, and validate data from mobile devices using Field Maps.
- Collaborating with various data aggregators to ensure schema is aligned with each organization's specific requirements and translating version of internal data accordingly.

Capstone Project in Collaboration with the Regional District of the East Kootenays

NG911 Translation Project | Jan 2024 – May 2024

- Developed ArcGIS Pro Python toolbox containing tools to navigate NG911 adoption by translating feature layer schema of address point data to comply with NENA standards.
- Analyzed NG911 Standard for GIS Data Model documentation; efficiently summarized, organized, and communicated results with the project sponsor.

Education

Bachelor of Technology in GIS

British Columbia Institute of Technology | 2026

Civil Engineering Technology Diploma

Lethbridge College | 2019
